When the component for the camera is not assigned

You can add this in the preset settings window

When the component is added, you will see the standard component interface

The screenshot shows a software interface for managing Look Up Tables (LUTs). On the left, there's a 'Search field' and a list of post-processing effects like 'Fog', 'Antialiasing', 'Ambient Occlusion', 'Screen Space Reflection', 'Depth Of Field', 'Motion Blur', 'Eye Adaptation', 'Bloom', 'Color Grading', 'User Lut', 'Chromatic Aberration', 'Grain', 'Vignette', and 'Dithering'. The main area displays a grid of LUT thumbnails, each with a name and a blending slider. A tooltip indicates that clicking a star adds the LUT to favorites, and holding the control key while clicking adds it to favorites unselected. A red box highlights a specific LUT, 'Science Fiction A', which is selected. The right sidebar shows a 'Project' panel with a list of assets including 'Materials', 'Plugins', 'Profiles', 'Scenes', 'Terrains', and 'Tree_Textu'.

Search field

Images amount per row
